There are plenty of apps on the Internet, some of them are good at reminding you to complete important tasks while others simply append an activity. Set up the desired groups using a simplistic layout MonoCalendar Activation Code is an easy-to-use and intuitive application that designed to offer a simple way to efficiently plan your daily chores structured in distinct calendars, like personal, work, project or school. It's recommended to have .NET Framework installed on the hard drive in order for the program to work. The provided interface is stylish and user-friendly divided into several calendars types on the left part of the window and the week split in individual days. The view can be easily changed between day, week and month, along with the option to enable the lateral display. Schedule multiple assignments for one day, week or month By default, the tool comes with Personal and Work categories to play with. You can add as many as you wish without any problem and give them a name that best represents their content. Unfortunately, it doesn't come with a context menu, and once you make a new section, the only way to change that is by deleting them, which leads to data loss. Plus, the colors for separating the calendars and events are set as default, and there is no option to modify them. If all the categories are checked, then all the entered tasks are displayed, which might give a cluttered look to the overall appearance. An
